

# **FASTIN-FASTON Product Line**

#### **Product Facts**

- Used for single and multiple connections
- Receptacles and tabs available for 6.3, 4.8 and 2.8 mm size (.250 – .187 and .110 Series)
- Receptacles mate with 0.5 and 0.8 thick tabs
- IEC 60335-1, Glow Wire 750° No Flame housings available
- **RoHS Compliant**

#### **Material and Finish**

**Contacts** — Brass, and phosphor bronze base material. Tin and nickel plated products available

**Housings** — Polyamide UL 94 V2 and UL 94 V0

# Technical Documents Application Specifications

114-2025 FASTIN-FASTON Product Line

TE FASTIN-FASTON connectors offer the advantage of the FASTON receptacles technology in multiple applications. In wiring harnesses, they are mainly used as multiposition and coupling connectors. Up to 8 position connectors can be mated in one operation with a maximum of 20 leads terminated.

# **Locking Contacts**

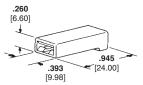

Receptacles and tabs in this version comply fully with the FASTON receptacles product technology. The only difference is the addition of a locking lance, which helps ensure firm retention of contacts when snapped into housings. Wiring harnesses prefabricated with male or female connectors can be easily connected to mating counterparts, even if manufacturing occurred at a different site. Any application of this technology leads to essential time savings in final assembly.
